

Message from Anjali Bhatt Saxena, MD
President North American Chapter

It is my pleasure and honor to assume the leadership of the North American Chapter of the International Society for Peritoneal Dialysis (NAC-ISPD). I want to thank my predecessor, Raj Mehrotra for his inspirational leadership of the organization for the past 2 years, during which time our Chapter's visibility and research activity increased notably.

The NAC-ISPD is the premier professional society representing the Peritoneal Dialysis Community in Canada and the United States of America. Our strength and success depends on our members. My predecessors and our current colleagues have been, and continue to be, an inspirational group committed to the practice, advancement, and utilization of PD in the ESRD patient population.

We, in the NAC-ISPD, have also proven to be a collaborative community – one that has crossed borders and other barriers in the name of patient care and scientific advancement in PD. It is my goal to continue to facilitate collaboration and communication between our members.

Warm regards,

Anjali Bhatt Saxena
President, North American Chapter
International Society for Peritoneal Dialysis
